COMMUNICATION

A View from a Research Engineer Working in an International Industrial Company

Dr. Ulrike Hanskötter

Research Engineer, Airbus, Germany

09.05.2014 – 14:00 – IC 03/653

The author will share own engineering experiences from ten years working in industry.

Analyzing difficulties or obstacles that could occur in technical (inter-cultural) communication is one way to raise the awareness in communication.

What is our intention in communication?

- To convince the other side
- To present oneself
- To exchange information
- To motivate others
- To find partners for a project

How is intention and content transferred?

Guests are welcome!
